

Data Engineer - Pune (Remote friendly)

Bluefin Analytics is growing its data platform team and we are hiring a Data Engineer. You will design batch pipelines on AWS, model data in Snowflake and keep our dbt projects healthy. The ideal candidate will have 3-6 experience with Python and SQL, hands-on Spark or Kafka, and a habit of writing tests. Compensation is 15-22 L notice period of up to 60 days. Immediate joiners preferred. How to apply: send your resume to talent@bluefin.
