- Delivered project 1: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 2: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 3: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 4: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 5: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 6: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 7: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 8: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 9: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 10: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 11: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 12: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 13: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 14: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 15: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 16: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 17: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 18: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 19: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 20: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 21: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 22: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 23: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 24: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 25: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 26: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 27: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 28: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 29: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 30: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 31: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 32: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 33: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 34: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 35: designed, built and shipped a feature for enterprise clients using Java and AWS

- Delivered project 36: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 37: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 38: designed, built and shipped a feature for enterprise clients using Java and AWS
- Delivered project 39: designed, built and shipped a feature for enterprise clients using Java and AWS
