PROFESSIONAL SUMMARY

Systems engineer with almost 4 years of experience administering Linux servers (RHEL, Ubuntu, CentOS), automating routine work with Bash, and running containers on Docker and Kubernetes across AWS and Azure.

EXPERIENCE

Linux Systems Engineer, Cloudwave Technologies, Bengaluru Jan 2023 - Present

- Administer 120+ RHEL and Ubuntu servers: installation, configuration, patching, upgrades and monitoring
- Wrote Bash automation for patching and log cleanup, cutting monthly maintenance effort by 35 percent
- Run Docker workloads on Kubernetes, and manage VMs and networking on AWS and Azure
- Troubleshoot TCP/IP, DNS and firewall issues; manage Microsoft 365 accounts and Hyper-V hosts

Trainee Systems Engineer, Cloudwave Technologies, Bengaluru Oct 2022 - Dec 2022

- Shadowed the infrastructure team on server builds, user access requests and incident handling

EDUCATION

B.E. in Electronics and Communication Engineering, Visvesvaraya Technological University, 2022, CGPA 8.0

SKILLS

Linux administration, RHEL, Ubuntu Server, CentOS, Bash, Docker, Kubernetes, AWS, Azure, TCP/IP, Hyper-V, Microsoft O365, monitoring, patching, Git

PROJECTS

Patch automation: Bash and cron tooling that patches server groups in waves and reports failures.
Container migration: moved three internal tools from VMs to Docker containers on Kubernetes.

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA), 2023
AWS Certified Cloud Practitioner, 2024
