PROFESSIONAL SUMMARY

Backend engineer with 7 years of experience designing and building REST APIs in Python and Flask, backed by PostgreSQL, deployed with Docker on AWS, with CI/CD pipelines and strong testing practice.

EXPERIENCE

Senior Python Backend Engineer, Nimbus Payments, Bengaluru Mar 2022 - Present

- Designed and built Flask REST APIs handling 2 million requests a day for a payments platform
- Moved services from EC2 to Docker containers on AWS ECS and cut deployment time by 45 percent
- Tuned PostgreSQL queries and indexes, reducing the slowest report from 40 seconds to 3 seconds
- Set up CI/CD with GitHub Actions, automated testing with pytest, mentored three junior engineers

Python Developer, Brightline Software, Bengaluru Jun 2019 - Feb 2022

- Built Flask and Django microservices and PostgreSQL schemas for an e-commerce marketplace
- Containerised applications with Docker and wrote integration tests, raising coverage to 85 percent
- Integrated AWS S3, SQS and Lambda for file processing and background jobs

EDUCATION

B.Tech in Computer Science and Engineering, Visvesvaraya Technological University, 2019, CGPA 8.2

SKILLS

Python, Flask, Django, REST APIs, PostgreSQL, Docker, AWS, CI/CD, GitHub Actions, pytest, Git, Linux

PROJECTS

Rate limiter service: token bucket rate limiting in Python with Redis, used by six internal APIs.
Audit trail library: reusable Flask extension that records changes to PostgreSQL tables.

CERTIFICATIONS

AWS Certified Developer - Associate, 2023
